# MANOS HOUSE

**MANOS HOUSE** is a residential treatment program designed for adolescent males between the ages of 14 and 20 with a history of substance use disorder. We provide care, supervision, and monitoring of those in our program 24 hours a day, 7 days a week.

Our **all-inclusive** residential facility is home to experienced care providers delivering individualized treatment that addresses every aspect of youth life.

The program combines therapy services with academic support, recreational activities, and family involvement. This **immersive, structured approach** allows youth to focus fully on their healing journey, while also fostering reconnection, resilience, and growth for the entire family.

> **"I came to Manos House as a messed up guy. I left knowing that I could be successful, and enrolled in college with the support of my family — which I thought I had lost forever. Manos House brought our family back together."** – RYAN B.

## EMOTIONAL AND PHYSICAL safety is paramount.

Our goal is to create a safe, positive environment and effective **treatment services** to motivate our residents and initiate lasting change.

**COUNSELING SERVICES |** Our individual, family, and group therapy sessions focus on nonjudgmental, positive, strength-based strategies that encourage healing and restoring relationships.

**CREATIVE THERAPIES |** Youth experience alternative methods of identifying and expressing emotions through art, music, physical fitness, and hands-on learning, as well as scheduled community recreational and educational opportunities.

**PRIVATE HIGH SCHOOL |** While receiving treatment, students continue their academic journey at a private, accredited High School located on our campus.

**LEADERSHIP & SERVICE |** Through advancement in our program, opportunities for leadership and service become available. By rewarding positive behavior and personal growth, we reinforce the habits they are building every day.

## GIVING YOUNG MEN A CHANCE TO CHANGE.

# FAQs

### How does Manos House help young men with substance use disorder?

Recovering from substance-use disorder requires more than just willpower. It demands a complete change of environment. By removing the triggers of daily life, we can focus on strengthening family relationships, repairing trust, and instilling personal confidence. We provide a safe and supportive environment in which youth are connected to mental health services, creative therapies, and academic opportunities.

### What is the typical length of stay?

We offer long-term and short-term options based on individual needs and progress in treatment with the average stay being four to five months. Our primary goal is helping residents successfully transition from supervised care to home life.

### Can clients have visitors?

Immediate family members, and approved extended family members, may visit once per week during one of the three designated visitation days.

### How much does the program cost?

Room and board, therapeutic services, and activities are all included at no cost to youth and their families. Funding is provided by private and medical assistance insurance plans, and county-funded options.

### Does treatment impact legal issues and academic standing?

Residents attend school daily and receive high school credits that transfer to their home school district. We collaborate with Juvenile Probation and/or Children and Youth Services to address existing legal charges, fines, and restitution.

### What is the next phase of treatment?

Youth completing the residential treatment program at Manos House may transition home or to our Supervised Independent Living (SIL) program. SIL helps young men develop life skills, physical and mental wellness, and resilience by gradually increasing independence and exposure to real-world stressors and situations in a safe environment.
